

Preferred Packing for Helmets for Return to BMDI

A. Please return in original packaging if at all possible.

If Original Helmet Packing is not available

Helmet to be wrapped for return

Sensitive Motor/Fan Area

The helmet motor/fan needs extreme care in packing for shipment. Wrap the helmet with 2-4 layers of bubble wrap, and ensure that the (black) motor/fan unit is completely covered by the 2-4 layers of bubble wrap.

Helmet wrapped with Motor/Fan Fully Covered with 2-4 layers of Bubble Wrap

B. If original packaging is not available, please package as similar to original packaging as possible.

C. If boxing similar to original packaging is not at all available, please -

1. Place some type of packaging "cushioning" around each helmet, bubble wrap, 3 layers of packing paper, etc.
2. Place no more than 4 Helmets in any one box and seal the box closed.

NOTE: If a pallet is needed,

- a) do not allow boxes to extend beyond the width and depth of the pallet, typically 48" x 40".
- b) do not allow the total height, from the ground to the top of the top box to exceed 70".
- c) ensure the pallet is clearly marked with a "DO NOT STACK" sign
